1 I am writing, because of my concern with nuclear storage at Yucca mountain. I oppose this, because of the safety of nearby residents, the ground water that flows under the mountain, and the fact that our storage technology is not as advanced as it should be for something as serious as this.

2 I also believe that this is very likely to turn into permanent storage, because people
 3 do not want this stored around them. We are going in the wrong direction with our energy consumption.

It we can't store it, we shouldn't produce it.

Thank you for your consideration, please take into account that the majority of Americans do not support this storage.
